(54) **Soccer practice game**

(57) The game involves the use of a screw in valve cover which enables a length of elastic to be connected to a football. When the other end of the elastic is attached to a ground disc soccer skills can be practised. Without attaching the elastic the ball can be used as normal.

THE DESCRIPTION

A Soccer Practice Game.

This is an original Soccer practice game.

When players practice Soccer on their own, in an open space, they are never in a position to practice kicking the ball as they spend most of their time retrieving it.

This invention comprises an original screw in valve cover which fits into a new valve attachment in a Soccer ball. It is a means by which the adapted Soccer ball can be fixed to a required length of elastic. The other end of the elastic is fixed to a Ground Disc thus forming a Soccer game. The invention will now be described with reference to the accompanying diagrams:

Figure 1 shows the Ground Disc which has an oval shape head and a pointed leg which is pushed into the ground.

Figure 2 shows the valve attachments and the position of the elastic.

Figure 3 shows the valve screwed into the ball with the elastic cord protruding.

Figure 4 shows the ball in use.

CLAIM

1. This new Soccer Practice Game comprises a screw in valve cover which fits into a valve attachment in a Soccer ball. It is a means by which the adapted Soccer ball can be fixed to a required length of elastic. The other end of the elastic is fixed to a Ground Disc thus forming a Soccer Game.

Amendments to the claims
have been filed as follows

2. This new soccer practice game comprises of a soccer ball tethered by means of - a strip of plastic/leather/twine or suitable material stitched into either side of a panel of a ball forming a strap, or, by means of, a loop being stitched into and on the side of the panel of a soccer ball. It is a means by which the soccer ball - without restricting its normal use when untethered - can be fixed to a required length of elastic. The other end of the elastic is fixed to a ground disc thus forming a soccer practice game.
